

Appendix A

Block # 1

Block Description: APPROPRIATE MANAGEMENT RESPONSE (AMR)

ZONE:		Initial Attack Dispatch Guide		Representative Weather Station	
District	NORTH FORK	** This is a guideline only. Fire managers and dispatchers will maintain flexibility in response as conditions warrant. **		RAWS ID	Kelly (100708) Eagle (100717)
RADIO INFORMATION		Transmit		Receive	Tones
Mobile/Mobile	Common Use 1	163.7125		163.7125	000.0
Mobile/Mobile	Common Use 2	168.6125		168.6125	000.0
Repeater -	North 1	170.5000		170.5000	146.2
Repeater -	North 2 (Junction)	170.5000		172.2250	167.9
Repeater -	North 3 (Eagle)	170.5000		172.2250	103.5
Repeater -	North 5 (Oiser)	170.5000		172.2250	123.0
Repeater -	North 6 (Hemlock)	170.5000		172.2250	131.8
Objective: Control Fire spread					
ERC	STRATEGY				
Low	Appropriate Management Response	See Below for Notifications and Special Considerations	DUTY OFFICER Considerations:		
21-30 Moderate	Appropriate Management Response	See Below for Notifications and Special Considerations	DUTY OFFICER Considerations:		
31-50 High	Appropriate Management Response	See Below for Notifications and Special Considerations	DUTY OFFICER Considerations:		
51-65 Very High	Appropriate Management Response	See Below for Notifications and Special Considerations	DUTY OFFICER Considerations:		
65 + Extreme	Appropriate Management Response	See Below for Notifications and Special Considerations	DUTY OFFICER Considerations:		

Notify: Duty Officer (Mike Lubke- FMO, Scott Schrenk- AFMO, Sean Gaines-Canyon Station Foreman)

- 1. Upon initial fire report, contact District Duty Officer. The Duty Officer will determine the appropriate Type of IC (ICT5, ICT4, ICT3) to respond. The Duty Officer and IC will determine appropriate resources to respond. Continue trying to contact District Duty Officer for 25 minutes. If contact is not made with Duty Officer, proceed to step 2.**
- 2. If the District Duty Officer cannot be contacted, contact the closest available, appropriately typed, IC (ICT5, ICT4, ICT3). Base Type of IC on the fire report, location, resources threatened, burning conditions, etc. The responding IC will determine the appropriate type and number of resources to respond. If contact is not made with any ICs within an additional 5 minutes, and the Duty Officer is still not responding, proceed to step 3.**
- 3. If GVC has not made contact with the District Duty Officer or any available ICs on the district within the 30 minutes of Step 1 and Step 2; a decision on how to manage the fire will need to be made by contacting the appropriate Line Officer or the Zone Fire Staff. Consider using Smoke Jumpers or Helitack to respond to the fire. This option should be deemed necessary based upon the fire report, location, resources threatened, burning conditions, etc.**
- 4. If the fire is within ¼-mile of Clearwater Potlatch Timber Protection Association (CPTPA) land, call CPTPA Dispatch at (208) 476-5612 in Orofino, ID.**

Special Considerations:

- 1. If fire report is within ½-mile of Deception Saddle, structures may be threatened. Consider launching helicopter for bucket support.**
- 2. If multiple fires are reported, fires within AMR area will take priority over fires within WFU area.**
